

Suggested application as described on Ken's website.
Please note that the +7V and -7V supplies for the normalised inputs will need to provide off-board

J1 to J8 and P1 to P7 are only available in the Hardware Kit

Corrections to Ken's website:
C1 and C2 are 100nF Monolithic Ceramics/Polyester not Electrolytics.
R10 and R11 are supplied as 1K not 3K3
